

Asbestos Acceptance Criteria & Instructions

Code:	FRM.DROP.665a	Version:	5.0 Jul 24
Section:	ISO Management System		Page 1 of 2

Asbestos waste is only accepted at our EcoDrop facility located: 40 Metro Place Bromley.

Asbestos that is not wrapped as per the instructions below will not be accepted due to the risk it poses to our employees and general public.

Acceptable Wrapping Methods

Polythene Sheeting

Asbestos sheeting, asbestos lagged pipes and similar long or large items should be wrapped in new heavy duty 200µm (minimum thickness) polythene sheeting. Once wrapped label the bundles to indicate the presence of asbestos. Double wrap the waste in polythene sheeting and apply adhesive tape to the entire length of every overlay to minimise the risk of the sheeting splitting or tearing. Bundles have a maximum allowable weight of 1000kg. We require any pallets brought into the facility to be left behind and have exchange pallets available.

Bags

Asbestos waste must be contained in new and heavy duty 200µm (minimum thickness) polythene bags.

All asbestos is to be double bagged and be closed with a goose tie. It is acceptable to use a zippered bag as the outer layer if the zippered bag is specifically sold for the disposal of asbestos.

The bags should be no more than ½ full to reduce the risk of bags tearing or splitting.

Mark bags clearly 'Caution Asbestos – Do not open or damage bag. Do not inhale dust'.

Drums

EcoCentral does not accept asbestos waste in drums.

There must be NO exposed asbestos product protruding from plastics bags or sheeting and acceptable wrapping methods used as above.

On Site Process

Asbestos waste is accepted between the hours of 8.00am – 12.00pm and 1.00pm – 4.00pm only. Asbestos waste is not accepted on Saturday, Sunday or public holidays.

1. Manifest / Permit information is recorded at Weighbridge Kiosk on arrival.
2. You will be directed to the locked compound.
3. A senior staff member will inspect incoming loads and unlock the Asbestos Waste Compound (AWC) to allow unloading. Non-compliant loads will not be accepted.
4. The AWC will be locked immediately following the delivery.

Disposal Costs

Please check our website, ask the kiosk or call our main office on 03 336 0080 for the current asbestos pricing.
